Adviro

• ASBESTOS – SAMPLE •

Please use the following procedure:

- Sample a small amount of suspect material (about the size of a nickel) and put into a Ziploc bag.
- Label the bag w/type of material - We recommend taking pictures of the sample and location (for your records to store with the lab results)

• LEAD – SAMPLE •

Please use the following procedure:

- Sample about 1x1 inch amount of suspect paint chip material (a little bigger than the size of a quarter) and put into a Ziploc bag.
- Label the bag w/type of material - We recommend taking pictures of the sample and location (for your records to store with the lab results)

• MOLD – SAMPLE •

Please use the following procedure:

- Cut out a 1x1 inch section of visible mold from the material and put into a Ziploc bag.
- Label the bag w/the location the sample was obtained from - We recommend taking pictures of the sample and location (for your records to store with the lab results)
- Test materials can also be obtained for surface sampling. Contact our office for additional information.
