---

## • ASBESTOS – SAMPLE •

*Please use the following procedure:*

- Sample a small amount of suspect material (about the size of a nickel, total) into a Ziploc bag.
- Label the bag w/type of material - We recommend taking pictures of the sample and location (for your records to store with the lab report)

---

## • LEAD – SAMPLE •

*Please use the following procedure:*

- Sample a large amount of suspect paint chip material (about the size of a roll of quarters, total) into a Ziploc bag.
- Label the bag w/type of material - We recommend taking pictures of the sample and location (for your records to store with the lab report)

---

## • MOLD – SAMPLE •

*Please use the following procedure:*

- Cut out a 1x1 inch section of visible mold from the material and place it inside a Ziploc bag.
- Label the bag w/the location the sample was obtained from - We recommend taking pictures of the sample and location (for your records to store with the lab report)
- Test materials can also be obtained for surface sampling. Contact our office for additional information.

---
